

9 Count, Inc.

Senior Software Engineer - iOS & Backend

DESCRIPTION

Venice, CA / FULL-TIME

We are a VC-backed company on a mission to create the world's best online community. Our founders have created products that have reached hundreds of millions of users such as musical.ly, Beep, HMBGR Phone, and many more.

We are currently looking for an experienced iOS and Backend **Senior Software Engineer** who can help build a product that truly impacts people's lives. Our new product allows users to discover and communicate with people in an innovative way. At 9 Count, we hire people that want to become the best. To us, that means more than just being smart. We want people who are hungry to make an impact on the world, people who will go the extra mile, people who recognize that this is their chance to create something truly incredible.

As a member of our team, your code will have an immediate and significant impact on our users and in fulfilling our company mission. This is an opportunity to help develop the core technology at an incredible consumer app startup.

RESPONSIBILITIES

- Collaborate with team to ship new features
- Develop high-quality code
- Work on optimizing app performance
- Help inform architectural decisions with the development team
- Discover and implement new technologies
